Left off this claim: ECG (93000). The note has no interpretation of the tracing. Details below.

Jane Sample · DOB 03/12/1968 · Date of service 11/10/2026 · A. Sample, MD (NPI 0000000000) · Office (POS 11)
Sample Health Plan, member ID SHP000000 · Coverage active on date of service · Documents: insurance card, visit note (2 pages), ECG tracing, Biotracker report

Diagnoses

ICD-10	DESCRIPTION	EVIDENCE IN YOUR DOCUMENTATION
I10	Essential (primary) hypertension	"Hypertension, not at goal. BP today 152/94, repeat 150/92." Visit note, page 1, Assessment
E11.9	Type 2 diabetes mellitus without complications	"Type 2 diabetes, stable. A1c 6.8% on 10/02. Continue metformin; repeat A1c in 3 months." Visit note, page 1, Assessment and Plan

Lines on this claim

CODE	SERVICE	WHY THIS CODE, AND THE EVIDENCE	CHARGE
99214	Office visit, established patient, moderate level of medical decision making Diagnoses: I10, E11.9	**Problems addressed: moderate.** One chronic illness that is not stable (hypertension, not at treatment goal). A second chronic illness, stable, was also addressed. **Risk of management: moderate.** Prescription drug management. "Increase lisinopril from 10 mg to 20 mg daily. Recheck BP in 4 weeks." Visit note, page 2, Plan · Two of the three decision-making elements meet the moderate level.	$185.00 from your fee schedule

Not on this claim

CODE	SERVICE	WHAT THE DOCUMENTATION IS MISSING	STATUS
93000	Routine ECG (12 or more leads): the tracing plus the physician's written interpretation	The tracing is in the file, but the note has no interpretation of it. If the physician interpreted the tracing at this visit, a dated, signed addendum can document it, and the line is checked again. Otherwise the code stays off the claim. The tracing-only code is separate and is not proposed automatically. ECG tracing, 11/10/2026 · Visit note, pages 1–2: no interpretation found	Not supported as documented

Checks run on this claim

- Diagnosis codes are valid for the date of service; each line points to a diagnosis that supports it.
- Each quote above was found, word for word, in the document it cites.
- The visit level follows from the documented problems and risk shown above.
- Code pairs were checked against national bundling edits (NCCI).

Device test linked to this visit

Biotracker test, 11/10/2026. Received from the device and matched to this patient. See the next page.

Kept with the visit record. In this sample the device test is not billed. A test is coded only when it is on Vinci's launch list and the note documents the order and the interpretation.

Illustrative — sample data, not a real patient or claim. Codes, quotes and amounts are examples. Service descriptions are written by Vinci and are not official code descriptors. CPT is a registered trademark of the American Medical Association. Vinci does not provide legal advice.

Device results

What your clinic sees for each Biotracker test: the measurements from the device file, with the unit and the reference range the device reports. Values outside that range are marked.

Patient	Jane Sample · DOB 03/12/1968
Test date	11/10/2026, 9:42 am
Device	Biotracker · serial SAMPLE-0001

Received	11/10/2026, 9:47 am, from the uploader at the clinic

Measurements · 8 of 42 shown in this sample

GROUP	MEASUREMENT	VALUE	UNIT	REFERENCE RANGE (DEVICE)	
Blood pressure	Systolic pressure, resting	148	mmHg	90–130	Outside range
	Diastolic pressure, resting	92	mmHg	60–85	Outside range
	Heart rate, resting	72	bpm	60–100	
Heart rate variability	Standard deviation of beat intervals	38	ms	30–100	
	Low-to-high frequency ratio	1.4	ratio	0.5–2.0	
Pulse wave	Pulse wave velocity	9.8	m/s	5.0–9.0	Outside range
Body composition	Body mass index	24.6	kg/m²	18.5–24.9	
	Body fat	29.1	%	21–33	

"Outside range" compares each value with the range in the device file. It is not a clinical interpretation.

Patient history
Each measurement across this patient's earlier tests, in one chart.

Export
Results by period as CSV, and the original report from the device.

Device status
Last contact and pending files for each device, with an alert when a device stops sending.

Illustrative — sample data, not a real patient or test. Measurement names, values and ranges are examples; the real panel shows what your device file contains. Biotracker is a device partner of Vinci Billing.
